A letter written requesting treatment for a woman in an independent assisted living home

_____ is an alzheimers patient who resides at _____ House and is in need of having her teeth cleaned. She is 76 years old. _____ no longer speaks, walks, reacts to anything very often. At times she will make a point with a facial expression at an appropriate time, so we know that sometimes she does know what is happening around her. _____ spoke several languages fluently and taught high school in Cupertino, Calif. for her teaching career. We went to High School together here in Anchorage. We think she may need work done on her teeth. They definitely need a good cleaning. Sometimes she will wince or grimace which makes us think her teeth may be the problem. Can you tell us please what you would recommend we do for _____? It is very difficult to move her to an office away from _____ House,., I would appreciate any advice. Thank you so much

Portable equipment to go into assisted living residences and family homes
