

# ICY CAPE MINING PROJECT and TIMBER HARVEST

## Public Informational Meeting

---

**Tuesday, October 29**  
**6:30 p.m. – 8:00 p.m.**  
**Yakutat High School Auditorium**  
(Refreshments will be served)

The Alaska Mental Health Trust Authority and the Trust Land Office will provide an update on the Icy Cape gold and industrial heavy minerals project and timber harvest operations, as well as other potential activities at Icy Cape.

The Trust's Icy Cape land block, about 75 miles northwest of Yakutat, contains significant prospects of gold and industrial heavy minerals, as well as timber resources.

This summer, the TLO continued sample collection as a part of ongoing efforts to determine the potential for mineral development of this project. In addition, timber resources were again harvested and shipped from Icy Cape.

Revenue generated from the Trust lands and resources are used by the Trust to support programs that serve Alaska's most vulnerable populations including people with mental illness, developmental disabilities, Alzheimer's disease and related dementia, traumatic brain injury and substance abuse disorders.
