

Beneficiary Projects Initiative (BPI) Grants

Background

- Supports peer-led programs for beneficiaries with mental illness, developmental disabilities, and related conditions.
- Founded on peer-based recovery and mutual aid principles since the early 2000s.

Purpose

- Empower beneficiaries to lead recovery and wellness services.
- Build a strong peer workforce and prevent costly hospitalizations/incarcerations.
- Serve those with complex needs outside traditional services.

Scope

- Funds grassroots, peer-driven recovery supports and skill-building programs.
- Provides capacity building, training, and service delivery statewide.

Data Methods

Data Sources

- Grantee-reported data were extracted from annual performance reports submitted to the Trust for each BPI grant.

Framework

- All data were reviewed and aligned with the Results-Based Accountability (RBA) framework, focusing on:
 - How Much Did We Do?
 - How Well Did We Do It?
 - Is Anyone Better Off?

Limitations:

- Data collection and reporting were disrupted during the COVID-19 pandemic, which may have affected completeness and consistency for some years.
- BPI grant programs vary widely in scope, population, and services; direct comparisons between BPI grants and other Trust grant programs may not be appropriate.

CHOICES

Fiscal Year	How Much (Unduplicated Served)	How Well (Client Satisfaction)	Better Off (Impact)
FY20	64	51%	Improved quality of life (50%, n=36)
