

PAL-PAK ***Informational Webinar***

Wednesday January 19th, 2022
11 a.m. to 12 p.m

Please join the State of Alaska Department of Behavioral Health, Seattle Children's Hospital and Help Me Grow Alaska to learn more about
The Partnership Access Line - Pediatric Alaska (PAL-PAK) Program.

Dr. Robert Hilt, MD, FAAP, Professor of Psychiatry at the University of Washington and the Medical Director at the Partnership Access Line and 2nd Opinion Consults at Seattle Children's Hospital will share PAL-PAK program details and be available for your questions.

The Partnership Access Line - Pediatric Alaska (PAL-PAK) supports primary care providers with questions about mental health care such as diagnostic clarification, medication adjustment or treatment planning.

The PAL team is staffed with child and adolescent psychiatrists affiliated with the University of Washington School of Medicine and Seattle Children's Hospital.

PAL-PAK psychiatrists are available to any medication-prescriber in Alaska with questions about mental health care (for example: medication adjustment, treatment planning or diagnostic clarification).

This will be a short peer-to-peer introduction to the program.

While PAL-PAK is an Alaska-specific program, other support is available through the PAL team to providers in Washington and Wyoming, and new programs are emerging that may be relevant to providers throughout Region X.

Join us to hear about the consultation resource and other services provided by the PAL team or to learn more about how behavioral telehealth consultation services can make a difference.
